Language: English  
Credits: 1

Frequency  
Every year

Remarque  
3-day Block course, every year in January. To register, contact EDMS Administration

Summary  
How to look at tiny things: visualizing protein localization in bacteria using epifluorescence microscopy.

Content  
Theory:  
Basics on protein localization in bacteria.  
Practical part:  
Preparing bacteria for microscopy.  
Staining methods to visualize bacteria.  
Epifluorescence microscopy.  
Comparison of protein localization depending on protein levels (varying artificial induction).  
Basic image analysis (MicrobeTracker).  
Independent analysis of an unknown bacterium for cell shape and potential localized fluorescently labeled proteins.

Note  
Note that while the course is open to all first and second year EPFL doctoral students, priority will be given to 1st & 2nd-year EDMS students, given that they are mandated to take three EDMS practicals modules.  
Note also that doctoral students from the Blokesch laboratory cannot take this course.  
Access is limited to 4 students. Takes place every year in January.
