			Semester	Spring
			Exam	Oral
			Workload	120h
			Weeks	14
			Hours	3 weekly
			Courses	2 weekly
			Project	1 weekly
			Number of positions	

Summary

This course covers the essential knowledge of contaminant partitioning and techniques to monitor chemical species, physical extent of contamination and biological processes. In the second part, remediation approaches are tackled. This course represents the fundamentals of remediation.

Content

Fundamental contaminant partitioning principles Microbial processes and their quantification Advanced monitoring techniques for contaminated sites Physical, chemical and biological approaches to remediation

Keywords

partitioning microbial processes bioremediation physico-chemical processes

Learning Prerequisites

Recommended courses

General Chemistry General Biology Microbiology for engineers Soil science

Important concepts to start the course

Fundamentals of soil science, porosity, bulk density Major biological processes, sulfate reduction, denitrification Partitioning of contaminants between phases Groundwater flow

Learning Outcomes

By the end of the course, the student must be able to:

- Synthesize information about a contaminated site
- Design a remediation approach appropriate for a given site

Transversal skills

• Use a work methodology appropriate to the task.

Teaching methods

Lectures, homework and a project (written report and oral presentation)

Expected student activities

The students are expected to attend the lecture, to work on the homeworks and be ready to ask questions during the homework session.

The project entails proposing an appropriate remediation approach for a given site, writing a report and presenting the project in an oral presentation.

Assessment methods

70% written test (120 min) during the semester; 30% oral exam during the exam session and written report (project)

Supervision

Office hours	No
Assistants	No
Forum	No

Resources

Bibliography Reading assignments available on Moodle

Notes/Handbook Course notes available at the bookstore.
