

CS-305

Software engineering

Candea George

Cursus	Sem.	Type
Communication systems	BA5	Opt.
Computational science and Engineering	MA1, MA3	Opt.
Computer science minor	H	Obl.
Computer science	BA5	Obl.
HES - IN	H	Obl.

Language of teaching	English
Credits	6
Session	Winter
Semester	Fall
Exam	During the semester
Workload	180h
Weeks	14
Hours	5 weekly
Courses	2 weekly
Project	3 weekly
Number of positions	

Summary

Covers basic aspects of modern software development tools and practices: the foundation of software engineering, thinking about software, structuring it, modifying it, and improving it. Covers the software development process (incl. agile methods) and working as part of a team of developers.

Content

- Object-oriented design and reasoning
- Design patterns
- Principles of building reliable and secure software
- Performance tuning
- Testing and debugging
- Code layout and style
- Development processes
- Software project management
- Tools for source code management and tools for writing and analyzing code

Being a good software engineer entails a continuous learning process. Unlike math or physics, this field changes fast, thus making continuous and independent learning essential. This course prepares students to become lifelong auto-didacts that build upon the foundation of immutable principles governing good software engineering.

Keywords

software development, software engineering, software design, software development tools, development processes, agile methods

Learning Prerequisites**Required courses**

This course builds on material taught in these courses, so you are required to have mastered their content:

- CS-107 Introduction to Programming
- CS-108 Practical of Object-Oriented Programming
- CS-210 Functional Programming
- CS-206 Parallelism and concurrency
- CS-207 System-oriented Programming

Recommended courses

The material in the following courses is helpful but not required:

- COM-208 Computer networks
- CS-208/209 Computer architecture

Important concepts to start the course

- Object-oriented programming (e.g., in Java)
- Using version control systems (e.g., Git)
- Using modern development tools (e.g., IDE, Android emulator)

Learning Outcomes

By the end of the course, the student must be able to:

- Design software that is reliable, secure, user-friendly, performant, and safe
- Implement (in software) sophisticated designs and algorithms
- Specify requirements for software systems
- Develop code that is maintainable
- Organize a team to execute a medium-sized software project
- Assess / Evaluate design and implementation options
- Choose alternatives to optimize for an objective (e.g., performance)

Transversal skills

- Plan and carry out activities in a way which makes optimal use of available time and other resources.
- Set objectives and design an action plan to reach those objectives.
- Assess progress against the plan, and adapt the plan as appropriate.
- Manage priorities.
- Evaluate one's own performance in the team, receive and respond appropriately to feedback.
- Give feedback (critique) in an appropriate fashion.
- Resolve conflicts in ways that are productive for the task and the people concerned.
- Assess one's own level of skill acquisition, and plan their on-going learning goals.
- Identify the different roles that are involved in well-functioning teams and assume different roles, including leadership roles.

Teaching methods

- Combination of online and in-class lectures
- Recitations and lab sessions
- Homework exercises
- Course project

Expected student activities

- Watch online lectures
- Attend and participate in lectures and recitations

- Read and understand assigned materials
- Complete programming assignments and attend lab sessions
- Work with team members to complete a substantial project

Assessment methods

Throughout the semester (contrôle continu). The final grade will be determined:

- 10% for 2 homework assignments done individually
- 50% for 1 team project
- 40% based on 2 exams (contrôle continu) and online quizzes

Supervision

Office hours	Yes
Assistants	Yes
Forum	Yes
Others	See http://sweng.epfl.ch/
