

MATH-260

**Discrete mathematics**

Pach János

Cursus	Sem.	Type
Mathematics	BA3	Obl.

Language of teaching	English
Credits	5
Session	Winter
Semester	Fall
Exam	Written
Workload	150h
Weeks	14
<b>Hours</b>	<b>4 weekly</b>
Courses	2 weekly
Exercises	2 weekly
<b>Number of positions</b>	

**Summary**

Study of structures and concepts that do not require the notion of continuity. Graph theory, or study of general countable sets are some of the areas that are covered by discrete mathematics. Emphasis will be laid on structures that the students will see again in their later studies.

**Content**

1. Elementary Combinatorics, counting.
2. Graphs, Trees.
3. Partially ordered sets, Set systems.
4. Generating functions.
5. Probabilistic method.
6. Linear Algebra method.

**Keywords**

Combinatorics, graphs, set systems

**Learning Prerequisites****Required courses**

Linear algebra, Analysis

**Learning Outcomes**

By the end of the course, the student must be able to:

- Analyze the structures
- Implement the systems
- Demonstrate the concepts for the discrete mathematics

**Transversal skills**

- Use a work methodology appropriate to the task.

**Teaching methods**

Ex cathedra lecture with exercises in the classroom.

**Assessment methods**

Written exam.

## Resources

### Bibliography

Discrete Mathematics: Elementary and Beyond (L. Lovasz, J. Pelikan, K. Vesztergombi), Combinatorics: Set Systems etc. (B. Bollobas), Invitation to Discrete Mathematics (J. Matousek, J. Nešetřil).
