## Summary

The semester project is designed to train the students in the solution of specific engineering problems. This makes use of the technical and social skills acquired during the master's programme.

#### Content

The semester project is designed to train the students in the solution of specific engineering problems. This makes use of the technical and social skills acquired during the master's program. Tutors propose the subject of the project, elaborate the project plan, and define the roadmap together with their students, as well as monitor the overall execution.

### Learning Outcomes

By the end of the course, the student must be able to:

• Analyze a technical problem

#### **Transversal skills**

• Write a scientific or technical report.
