Summary

The objective of this teaching unit is the development of a low-rise, high-density proposal for the redevelopment of Maligawatte, an informal settlement area in Colombo currently slated for demolition and resident relocation.

Content**Learning Outcomes**

By the end of the course, the student must be able to:

Transversal skills

- Set objectives and design an action plan to reach those objectives.
- Plan and carry out activities in a way which makes optimal use of available time and other resources.
- Use a work methodology appropriate to the task.
- Communicate effectively, being understood, including across different languages and cultures.
- Evaluate one's own performance in the team, receive and respond appropriately to feedback.
- Keep appropriate documentation for group meetings.
- Take account of the social and human dimensions of the engineering profession.
- Access and evaluate appropriate sources of information.
