**Spatial decision support systems**

Golay François

<b>Cursus</b>	<b>Sem.</b>	<b>Type</b>
Environmental Sciences and Engineering	MA2, MA4	Opt.
Mineur STAS Russie	E	Opt.
Urban Planning and Territorial Development minor	E	Obl.

Language of teaching	English
Credits	3
Session	Summer
Semester	Spring
Exam	Written
Workload	90h
Weeks	14
<b>Hours</b>	<b>3 weekly</b>
Courses	2 weekly
Exercises	1 weekly
<b>Number of positions</b>	

**Summary**

The course deals with the methods and instruments supporting decision processes in the geographical space. The focus is on multi-criteria decision analysis, with the special requirements carried by space-related scenarios and solutions, and by the participatory processes among numerous stakeholders.

**Content**

- Situations and cases of decision making in territorial and environmental planning and management
- Spatial decision processes and steps
- Spatial decision support processes and tools
- Multi-criteria decision making (MCDM) and its spatial applications
- Collaborative/group spatial decision-making
- Hands-on exercises of MCDM with GIS
- Cases studies and seminars

**Learning Prerequisites****Recommended courses**

Basic knowledge and skills in GIS

**Learning Outcomes**

By the end of the course, the student must be able to:

- Expound most importance issues of spatial decision making
- Choose relevant methods for spatial decision support
- Apply most important multi-criteria decision analysis processes
- Organize a decision making process involving many stakeholders

**Transversal skills**

- Make an oral presentation.
- Summarize an article or a technical report.

### **Teaching methods**

Lecture, exercises, seminars

### **Assessment methods**

33 % spot written check during the semester  
33 % continuous control during the semester (seminar synthesis)  
33 % written test (60 min) during the exam session

### **Resources**
