# PHYS-405 Experimental methods in physics

Cantoni Mar	co, Dwir Benjamin			
Cursus	Sem.	Туре	Language of	English
Ingphys	MA1, MA3	Opt.	teaching	English
Physicien	MA1, MA3	Opt.	Credits Session	3 Winter
			Semester	Fall
			Exam Workload	Oral 90h

# Summary

The course's objective are: Learning several advenced methods in experimental physics, and critical reading of experimental papers.

#### Content

- Noise and interference: Their origins, their influence on experimental results, methods for noise and interference reduction

- Scanning probe microscopy (SPM): Principles of operation of the scanning tunneling microscope and atomic force microscope, Advanced scanning microscopy techniques, applications

- Optical spectroscopys: The elements of a modern spectroscopy system, methods of spectral dispersion and their advantages, optical detectors

- Electron microscopy: Transmission and scanning microscopes, their principles of operation, observation tecniques, uses ...

- Structural characterization: RX, electron diffraction, ...

#### **Keywords**

Noise, Scanning probe microscopy, optical spectroscopy, transmission electron microscopy, scanning electron microscopy, electron diffraction, X-ray diffraction

#### **Learning Prerequisites**

Recommended courses Basis courses in physics

**Important concepts to start the course** fundamentals of optics, electromagnetics, atomic and solid-state physics

### Learning Outcomes

By the end of the course, the student must be able to:

- · Integrate the notions of critical reading of articles
- Assess / Evaluate scientific articles, their quality and defaults
- · Interpret knowledge of several specific experimental methods

#### **Transversal skills**

14

3 weekly 2 weekly

1 weekly

Weeks

Hours

Courses Exercises

Number of positions

- Communicate effectively, being understood, including across different languages and cultures.
- Give feedback (critique) in an appropriate fashion.
- Demonstrate the capacity for critical thinking
- Access and evaluate appropriate sources of information.
- Make an oral presentation.
- Summarize an article or a technical report.

### **Teaching methods**

- Ex cathedra lectures on specific experimental techniques
- Students' presentations of scientific articles

## **Expected student activities**

Participation in class is encouraged. Students are expected to give a short presentation of a scientific article.

Assessment methods

oral exam (100%)

Supervision

Others Moodle

### Resources

Notes/Handbook All is put on the Moodle site
