

BIO-657

Landmark Papers in Cancer and Infection

Fellay Jacques, Various lecturers

Cursus	Sem.	Type
Molecular Life Sciences		Obl.

Language of teaching	English
Credits	2
Session	
Exam	Oral presentation
Workload	60h
Hours	28
Courses	28
Number of positions	

Frequency

Every 2 years

Remark

Every two year / Next time: Spring 2018

Summary

The topics will cover all the fields in which the GHI and ISREC PIs work.

Content

It will allow the students to be exposed to (non exhaustive):

- various pathogenic organisms (bacteria, viruses and helminths)
- different experimental infection models (cells, mice, daphnae, flies)
- various models to study animal development
- various systems to study cancer

Each session will include a 30 min introduction by the professors, followed by the presentation and dissection of a paper in the field. All students will prepare the paper beforehand and a student will be selected for the presentation.

Note

The course will take place from beginning February to end May/beginning June 2016.

Keywords

Infection, cancer, development, cell division, epigenetics, genomics, drug development.

Learning Prerequisites**Recommended courses**

Basic cell and molecular biology.
