

MICRO-704 **IC design for robustness**

Kayal Maher

Cursus	Sem.	Type
Electrical Engineering		Obl.
Microsystems and Microelectronics		Obl.

Language of teaching	English
Credits	2
Session	
Exam	Written & Oral
Workload	60h
Hours	33
Courses	33
Number of positions	

Remark

August 27 to 31, 2018

Summary

This course is aimed at providing engineers with up-to-date information on important current issues of design in analog and mixed-mode integrated circuits. In general, the content of the lectures covers introduction, state-of-the-art in the specific field and practical case studies.

Content**Note**

* Organized by MEAD/EPFL
