

CIVIL-706

**Advanced Earthquake Engineering**

Diana Lorenzo, Lestuzzi Pierino

<b>Cursus</b>	<b>Sem.</b>	<b>Type</b>
Civil & Environmental Engineering		Obl.

Language of teaching	English
Credits	2
Session	
Exam	Oral
Workload	60h
<b>Hours</b>	<b>28</b>
Courses	22
TP	6
<b>Number of positions</b>	

**Frequency**

Every 3 years

**Remark**

Every three years/ Next time: Fall 2020. Minimum 6 inscrits

**Summary**

This course deals with the complex problem of seismic evaluation of existing structures; by far more complicated than for new structures. Aims are to: - show how and why the analysis methods need improvements to be used in this context. - provide an insight of the different retrofitting methods.

**Content**

- Particularity of existing structures in seismic context
- Vulnerability and seismic evaluation
- Analysis methods
- Strength and displacement based evaluation
- Retrofitting methods (design and technology)
