

BIO-617

Practical - Gönczy Lab

Gönczy Pierre

Cursus	Sem.	Type
Molecular Life Sciences		Obl.

Language of teaching	English
Credits	1
Session	
Exam	Project report
Workload	30h
Hours	24
Courses	6
TP	18
Number of positions	2

Frequency

Every year

Remark

3-day Block course, every year in January. To register, contact EDMS Administration

Summary

Give students a feel for some of the approaches pursued to understand mechanisms underlying cell division processes, primarily in *C. elegans* embryos but also in other systems, including human cells in culture.

Content

Students will conduct experiments (time-lapse microscopy, indirect immunofluorescence microscopy, ...) that should allow them to formulate a reasonable hypothesis about the function of a mystery gene that will be assigned to them.

Keywords

Cell division, *C. elegans*, human cells, developmental biology, genetics, functional genomics.

Learning Prerequisites**Recommended courses**

None
