**Reading group in applied topology I**

Hess Bellwald Kathryn

Cursus	Sem.	Type
Mathematics		Opt.

Language of teaching	English
Credits	1
Session	
Exam	Oral presentation
Workload	30h
<b>Hours</b>	<b>28</b>
Courses	14
TP	14
<b>Number of positions</b>	

**Frequency**

Only this year

**Remark**

Fall semester - Fridays from 29.10.2020

**Summary**

In this reading group, we will work together through recent important papers in applied topology. Participants will take turns presenting articles, then leading a discussion of the contents.

**Content**

The field of applied topology is growing extremely rapidly, in terms of both the development of new theory and the elaboration of significant new applications. The goal of this reading group is to provide a framework in which to survey the literature efficiently, to ensure that all participants are aware of the most significant recent developments. PhD student participating in the course for credit must give two presentations of all or part of an article selected by the course coordinator.

Some articles studied last year:

<https://journals.aps.org/pre/abstract/10.1103/PhysRevE.100.032305>

<https://www.mdpi.com/1099-4300/21/9/869/htm>

<https://arxiv.org/abs/1910.00960>

<https://arxiv.org/abs/1906.01507>

<https://arxiv.org/abs/1812.02139>

<https://arxiv.org/abs/1904.07403>

Following articles will be studied carefully and in detail:

<https://arxiv.org/pdf/2008.00063.pdf>

<https://arxiv.org/abs/2008.13697>

<https://arxiv.org/abs/2007.12213>

**Keywords**

Applied topology, topological data analysis
