

BIO-603(TL)

Practical - Tang Lab

Tang Li

Cursus	Sem.	Type
Molecular Life Sciences		Obl.

Language of teaching	English
Credits	1
Session	
Exam	Multiple
Workload	30h
Hours	24
Lecture	6
Practical work	18
Number of positions	2

Frequency

Every year

Remark

3-day Block course, every year in January. To register, contact EDMS Administration

Summary

In this course, the students will learn the basics skills in cancer immunotherapy and immunoengineering. Open to 4 students.

Content

The students will learn how to

- 1) isolate and purify immunotherapeutics
- 2) formulate engineered nanoparticle delivery system
- 3) evaluate in vitro killing efficiency with effector T cells

Note

The course won't take place in January 2024. Back in 2025!

Please note that you are not allowed to inscribe in your own group!

Note that 3 practical courses are mandatory for all EDMS students and that they have the priority; each course has between 2 to 4 possible slots.

Therefore, please do not register by yourself to this course, this will be done by the EDMS program administrator!

Keywords

cancer immunotherapy, immunoengineering

Learning Prerequisites**Required courses**

Immunology

Recommended courses

Biomaterials

Learning Outcomes

By the end of the course, the student must be able to:

- See above in the filed "Note"

Assessment methods

Project report
Oral presentation
