ENV-540

Image processing for Earth observation

de Morsier Frank Grégoire Jean

Cursus	Sem.	Type
Civil & Environmental Engineering		Opt.
Environmental Sciences and Engineering	MA1, MA3	Opt.
Space technologies minor	H	Opt.
Urban Planning and Territorial Development minor	H	Opt.

Language of teaching	English
Credits	3
Session	Winter
Semester	Fall
Exam	During the semester
Workload	90h
Weeks	14
Hours	**3 weekly**
Courses	2 weekly
Exercises	1 weekly
Number of positions	

Summary

This course covers optical remote sensing from satellites and airborne platforms. The different systems are presented. The students will acquire skills in image processing and machine learning to extract end-products, such as land cover or risk maps, from the images.

Content

Courses content:

1. Basic concepts of remote sensing and digital imaging
2. Platforms and sensors
3. Information extraction
4. Image classification
5. Multitemporal processing and change detection

Project:

- Study a real (geospatial or other) problematic using remote sensing and image processing techniques.

Keywords

Imagery, remote sensing, image processing, signal processing, machine learning, satellites

Learning Outcomes

By the end of the course, the student must be able to:

- Describe remote sensing systems
- Describe applications of remote sensing
- Select appropriately the relevant system for a given application
- Perform image classification
- Perform information extraction
- Implement a processing chain to solve a real problem

Transversal skills

- Use a work methodology appropriate to the task.
- Continue to work through difficulties or initial failure to find optimal solutions.
- Access and evaluate appropriate sources of information.

- Collect data.
- Make an oral presentation.
- Write a scientific or technical report.
- Assess progress against the plan, and adapt the plan as appropriate.
- Use both general and domain specific IT resources and tools

Teaching methods

Lessons ex-cathédra (2/3)
Exercise sessions and group project (1/3)

Assessment methods

- Mid-term written test (40% of the final mark)

- Project report (60% of the final mark)

remark: the balance between mid-term and project has changed since previous years.
