Learning Outcomes

By the end of the course, the student must be able to:

- Understand standard valuations models used in financial markets
- Understand the trade-off between risk and return

- Develop an ability to make portfolio decisions
- Develop an ability to analyze and evaluate firms and investment projects
- Understand the determinants of financing decisions
- Understand derivatives markets and their benefits and costs

Transversal skills

- Plan and carry out activities in a way which makes optimal use of available time and other resources.
- Use a work methodology appropriate to the task.
- Communicate effectively, being understood, including across different languages and cultures.
- Communicate effectively with professionals from other disciplines.
- Give feedback (critique) in an appropriate fashion.
- Evaluate one's own performance in the team, receive and respond appropriately to feedback.
- Keep appropriate documentation for group meetings.
- Negotiate effectively within the group.
- Resolve conflicts in ways that are productive for the task and the people concerned.
- Assess one's own level of skill acquisition, and plan their on-going learning goals.
- Use both general and domain specific IT resources and tools
- Access and evaluate appropriate sources of information.
- Collect data.
