EE-490(e)	Lab in microwave	S			
	Skrivervik Anja				
Cursus		Sem.	Туре	Language of	English
Electrical and E	lectronical Engineering	MA1, MA3	Opt.	teaching	Linglish
			•	Credits	4
				Withdrawal	Unauthorized
				Session	Winter
				Semester	Fall
				Exam	During the semester
				Workload	120h
				Weeks	14
				Hours	4 weekly
				TP	4 weekly
				Number of positions	
				from this s	wed to withdraw subject after the ion deadline.

## Summary

This lab teaches the major measurement techniques used in microwaves

#### Content

- the slotted line
- microwave couplers
- time domain reflectometry
- antenna measurement
- spectrum anayser
- network analyser
- noise measurement

# Keywords microwaves, SA, VNA, slotted line, antennas

Learning Prerequisites

Required courses electromagnetism

Recommended courses microwaves (in parallel)

# Learning Outcomes

By the end of the course, the student must be able to:

- Use tn Imajor measurement techniques in microwaves
- Analyze results
- Estimate measurment precision

# Transversal skills

- Write a scientific or technical report.
- Collect data.
- Make an oral presentation.

## **Teaching methods**

labs, discussions and presentations

#### **Expected student activities**

- do the experiments
- synthetize the results
- present and discuss the results
- do a report

### Assessment methods

Both the work in the lab and the reports will be assessed
