

# PHYS-302 Biophysics : physics of biological systems

Cursus	Sem.	Type
Biomedical technologies minor	Н	Opt.
Ingphys	MA1, MA3	Opt.
Life Sciences Engineering	MA1, MA3	Opt.
Physicien	MA1, MA3	Opt.

Rahi Sahand Jamal

Language of teaching	English
Credits	4
Session	Winter
Semester	Fall
Exam	Written
Workload	120h
Weeks	14
Hours	4 weekly
Courses	2 weekly
Exercises	2 weekly
Number of	
positions	

# **Summary**

Understand and use population genetics, population dynamics, network theory, and reaction network dynamics to analyze and predict the behavior of living systems

## Content

Master equation, population genetics, finite populations, genetic drift, stochastic modeling, fluctuating environments

Introduction to networks, dynamics on networks

Biochemical reaction networks, Michaelis-Menten kinetics, cooperativity, autoregulation, feedback and bistability, switches, oscillations, feed-forward loop network motif, stochastic gene expression, causes and consequences of stochastic gene expression, robustness

#### **Keywords**

physics of living systems, population genetics, population dynamics, genetic networks, systems biology

# **Learning Prerequisites**

#### **Recommended courses**

physics, mathematics, and biology at the introductory university level

# **Teaching methods**

Lectures, paper discussion, problem solving

# **Expected student activities**

attending the lectures, completing exercises, reading and presenting recent papers in the field

# **Assessment methods**

graded homework sets, final exam

# Supervision

Office hours Yes Assistants Yes
