Summary

The engineering internship is an integral part of the curriculum for master's students. They join companies in Switzerland or abroad to carry out an internship or their master's project in a field of activity where the skills of the futur Engineer are highlighted.

Content

Internships represent an important experience for students, allowing them to achieve the following goals:

- Immerse themselves in the professional world
- Highlight the importance of teamwork
- Consider the imperatives of a companyin its processes
- Put into practice the knowledge acquired from the study plan

The following three forms of internship are possible as part of the master's study plan:

- 8 weeks internship during the summer only
- 6 months (long) internship. The student is on leave for one semester
- Master project in the industry (25 weeks)

Learning Prerequisites

Required courses

- Have completed one full semester for students who have obtained their Bachelor EPFL
- Have completed two full semesters for students coming from another university

Learning Outcomes

By the end of the course, the student must be able to:

- Be aware of the importance of legal procedures and the ethical code of the profession
- Communicate effectively and be understood
- Self-assess the level of acquired skills and plan the next goals
- Manage the priorities
- Receive and give feedback (criticism) and respond appropriately

Expected student activities

The student agrees to do this internship with the professionalism

Assessment methods

- Short internship (8 weeks): electronic evaluation at the end of the internship
- Long internship (6 months) : electronic evaluation at the end of the internship
- Master's project in the industry : see the master's project course book

Supervision

Others Industry supervisor

EPFL supervisor
