Summary

Industrial internship in a field related to Management of Technology and Entrepreneurship.

Content

The industrial internship allows:

- The immersion into the professional world
- To get acquainted with a company's processes and requirements
- To realize the importance of teamwork
- To put into practice the knowledge acquired during the MTE master cycle

The industrial internship lasts 8 weeks and is followed by a 17-week academic master project.

The master project allows:

- To realize an academic project covering theoretical and practical aspects of a topic in the field of Management of Technology and Entrepreneurship.

Learning Outcomes

- Apply scientific, technical and organisational knowledge as appropriate to the context

Transversal skills

- Set objectives and design an action plan to reach those objectives.
- Use a work methodology appropriate to the task.
- Communicate effectively, being understood, including across different languages and cultures.
- Evaluate one's own performance in the team, receive and respond appropriately to feedback.
- Respect the rules of the institution in which you are working.
- Manage priorities.
- Take feedback (critique) and respond in an appropriate manner.

Assessment methods

Written report, to be submitted according to the Section's directives.

Evaluation report to be filled out by the student and the company supervisor at the end of the internship.
