

MICRO-582

Interdisciplinary project

Profs divers *

Cursus	Sem.	Type
Robotics	MA1, MA2, MA3, MA4	Opt.

Contact language	English
Credits	10
Withdrawal Session	Unauthorized Winter, Summer
Semester Exam	Fall During the semester
Workload Weeks	300h 14
Hours	10 weekly
Project	10 weekly
Number of positions	

Summary

The student applies the acquired skills to an academic or industrial project.

Content

The students are confronted with the realization of an engineering project integrating several aspects of robotics. This project will allow them to apply, to concrete problems, skills of domain and transversal skills acquired during their studies.

Learning Outcomes

By the end of the course, the student must be able to:

- Manage an individual research project
- Apply the competences to a specific subject
- Design research
- Assess / Evaluate the results critically
- Compose in written form in a scientific report
- Expound the project in oral form for a scientific audience
- Develop the project in oral form for a scientific audience
- Present data coherently and effectively

Teaching methods

Continuous assessment (report)

Assessment methods

Continuous assessment (report)
