Robotics project II

Profs divers *

Cursus	Sem.	Type
Robotics	MA1, MA2, MA3, MA4	Obl.

Contact language	English
Credits	10
Withdrawal Session	Unauthorized Winter, Summer
Semester Exam	Fall During the semester
Workload Weeks	300h 14
Hours	10 weekly
Project	10 weekly
Number of positions	

Summary

The student applies the acquired skills in an engineering or a research project.

Content

Students are asked to run an engineering or a research project integrating several robotics aspects. This project allows them to practice and improve their skills on concrete problems related to robotics, and experience a project environment in a laboratory, making the connection to research or industry.

Learning Outcomes

By the end of the course, the student must be able to:

- Develop an individual research or industrial project
- Apply skills to a specific subject
- Manage the project
- Assess / Evaluate the results
- Compose a written scientific report of a project
- Present a project orally for a scientific audience
- Develop expertise in a specific research area
- Represent data in a consistent and effective manner

Transversal skills

- Set objectives and design an action plan to reach those objectives.
- Assess progress against the plan, and adapt the plan as appropriate.
- Give feedback (critique) in an appropriate fashion.
- Access and evaluate appropriate sources of information.
- Write a scientific or technical report.
- Write a literature review which assesses the state of the art.
- Use a work methodology appropriate to the task.
- Communicate effectively, being understood, including across different languages and cultures.

Assessment methods

Written report and oral presentation
