

MGT-302

Data driven business analytics

Kiyavash Negar, Ulrych Urban

Cursus	Sem.	Type
Humanities and Social Sciences	BA6	Obl.

Language of teaching	English
Credits	2
Session	Summer
Semester	Spring
Exam	During the semester
Workload	60h
Weeks	14
Hours	2 weekly
Lecture	2 weekly
Number of positions	80

Remark

Une seule inscription à un cours SHS+MGT autorisée. En cas d'inscriptions multiples elles seront toutes supprimées sans notification

Summary

This course focuses on methods and algorithms needed to apply machine learning with an emphasis on applications in business analytics.

Content

The following topics will be covered in the course:

1. Supervised learning

- Linear Regression
- Gradient Descent and Stochastic Gradient Descent
- Multiclass Classification
- K-NN
- Support Vector Machines
- Decision Tree and Random Forest

2. Unsupervised learning

- Regularization and Model Selection
- Cross Validation
- PCA

3. Deep Learning

- Deep Neural Networks
- Back propagation

4. Graphical models

- Bayesian networks
- Inference and structure learning

5. Causal inference in time series

- Granger causality
- Directed information Graphs

6. Quantitative Risk Management

- Risk Measures: Value at Risk and Expected Shortfall
- Statistical Estimation and Risk Measurement

7. Statistical Learning for Finance

- Shrinkage, Ridge Regression, LASSO and Dimension Reduction
- Predicting Financial Returns

Keywords

machine learning, causal inference, time series, quantitative risk management

Learning Prerequisites**Required courses**

A course in basic probability theory

A course in basic linear algebra

Calculus

Familiarity with Python or Matlab

Important concepts to start the course

Students should be familiar with basic concepts of probability theory, calculus, linear algebra, and programming.

Learning Outcomes

By the end of the course, the student must be able to:

- Formulate supervised and unsupervised learning problems and apply it to data

Transversal skills

- Assess one's own level of skill acquisition, and plan their on-going learning goals.

Teaching methods

Formal teaching interlaced with practical exercises.

Expected student activities

Attending lectures and working on homework and projects.

Assessment methods

Three homeworks (33.33333333% each)

Supervision

Office hours	Yes
Assistants	Yes
Forum	No
