

HUM-398

Design for sustainability II

Conti Marius, Laperrouza Marc, Mélo Michka

Cursus	Sem.	Type
Humanities and Social Sciences	MA2	Obl.
UNIL - Autres facultés	E	Opt.
UNIL - HEC	E	Opt.

Language of teaching	English
Credits	3
Withdrawal	Unauthorized
Session	Summer
Semester	Spring
Exam	During the semester
Workload	90h
Weeks	14
Hours	3 weekly
Project	3 weekly
Number of positions	60

It is not allowed to withdraw from this subject after the registration deadline.

Remark

Une seule inscription à un cours SHS+MGT autorisée. En cas d'inscriptions multiples elles seront toutes supprimées sans notification. S'inscrit dans le programme TILT (<https://go.epfl.ch/tilt>).

Summary

This course explores and practices some of the fundamental tools of designing for sustainability with a focus on the sustainability, desirability, and economic viability of solutions.

Content

See the full description in the autumn semester course - HUM-397: Design for sustainability I.

During the spring semester, sessions are devoted to the prototyping of a solution through a project-based approach.

Lecturers provide guidance on semester projects on a regular basis.

Teams will be made up of engineers (EPFL), industrial designers (ECAL), and social scientists (UNIL)

As part of the TILT program, there will be one online and asynchronous workshop per semester aimed at strengthening professional competences (interdisciplinary and team work, etc.). Students will be asked to keep a logbook as a basis for their individual reflexive note.

Keywords

design process, desirability, viability, sustainability, prototyping, interdisciplinarity, project-based learning

Learning Prerequisites**Required courses**

HUM-397: Design for sustainability I

Learning Outcomes

By the end of the course, the student must be able to:

- Apply an iterative prototyping approach to test the sustainability, desirability, economic viability of a project
- Develop an innovative and sustainable project through ideation techniques
- Estimate the potential impact of a sustainability-driven project

Transversal skills

- Communicate effectively with professionals from other disciplines.
- Take account of the social and human dimensions of the engineering profession.

Teaching methods

- Group work under weekly lecturer supervision

Expected student activities

- Work in interdisciplinary teams
- Attend weekly project consultations at ECAL
- Design a solution through prototyping
- Document and valorize the processes of designing for sustainability

Assessment methods

- Project and documentation: 80% (groupwork)
- Reflexive note: 20% (individual)

Supervision

Office hours	No
Assistants	No
Forum	No
