

CH-343

**Spectroscopy**

Drabbels Marcel

Cursus	Sem.	Type	
Chemistry and chemical engineering	BA4	Obl.	
			Language of teaching English
			Credits 3
			Session Summer
			Semester Spring
			Exam Oral
			Workload 90h
			Weeks 14
			<b>Hours</b> <b>3 weekly</b>
			Lecture 2 weekly
			Exercises 1 weekly
			<b>Number of positions</b>

**Summary**

Introduction into optical spectroscopy of molecules

**Content**

- Overview of Molecular Spectroscopy
- Molecular Symmetry and Molecular Spectroscopy
- Rotational Spectroscopy
- Vibrational Spectroscopy
- Electronic Spectroscopy

**Learning Prerequisites****Recommended courses**

Quantum Chemistry

**Learning Outcomes**

By the end of the course, the student must be able to:

- Discuss the Born Oppenheimer approximation and its consequences
- Derive line intensities of transitions
- Derive rotational energy levels of different types of molecules
- Analyze rotational spectra
- Derive vibrational energy levels of molecules
- Analyze rovibrational spectra
- Describe Raman spectroscopy
- Analyze Raman spectra
- Formulate the Franck Condon principle
- Analyze rovibronic spectra of diatomic molecules
- Work out / Determine selection rules using group theory

**Teaching methods**

Ex Cathedra with excercise sessions

### Expected student activities

Work on the excercises at home

### Assessment methods

Oral exam

### Resources

#### Bibliography

Primary References:

- J. M. Hollas, *Molecular Spectroscopy*
- C. H. Townes and A. L. Schawlow, *Microwave Spectroscopy*
- D. A. McQuarrie, *Quantum Chemistry*

Secondary References:

- G. Herzberg, *Molecular Spectra and Molecular Structure. I. Spectra of Diatomic Molecules*
- G. Herzberg, *Molecular Spectra and Molecular Structure. II. Infrared and Raman Spectra of Polyatomic Molecules*
- G. Herzberg, *Molecular Spectra and Molecular Structure. III. Electronic Spectra and Electronic Structure of Polyatomic Molecules*

#### Ressources en bibliothèque

- Modern spectroscopy / Hollas
- Quantum chemistry / McQuarrie
- Spectra of diatomic molecules / Herzberg
- Microwave spectroscopy / Townes
- Infrared and Raman spectra of polyatomic molecules / Herzberg
- Electronic spectra and electronic structure of polyatomic molecules / Herzberg
