Summary

Research-oriented project in Management of Technology and Entrepreneurship carried out during a 25-week internship in industry, and upon which the student writes a master thesis.

Content

The master project in industry allows to:

- Give the opportunity to put into practice the academic knowledge acquired in the MTE master courses
- Gain professional experience, and understand the organization, functioning and management of a company, and to develop soft skills (interpersonal skills) that are necessary for the practice of future professional activity
- Facilitates the transition between university and the first job

Learning Outcomes

- Apply scientific, technical and organisational knowledge as appropriate to the context

Transversal skills

- Plan and carry out activities in a way which makes optimal use of available time and other resources.
- Set objectives and design an action plan to reach those objectives.
- Use a work methodology appropriate to the task.
- Communicate effectively, being understood, including across different languages and cultures.
- Manage priorities.
- Take feedback (critique) and respond in an appropriate manner.
- Access and evaluate appropriate sources of information.
- Collect data.
- Make an oral presentation.
- Write a literature review which assesses the state of the art.

Assessment methods

Master thesis with final presentation, followed by an oral test.
