## **Summary**

This teaching lab provides the experimental experiences associated to courses of all MSc orientations in EE. The experiments cover all the fields belonging to EE.

### **Learning Outcomes**

By the end of the course, the student must be able to:

- Argue hypothesis justifying a physical observation
- Formulate physical explanations
- Synthesize experimental results
- Organize the work within a team of students

#### Transversal skills

- Use a work methodology appropriate to the task.
- Give feedback (critique) in an appropriate fashion.
- Identify the different roles that are involved in well-functioning teams and assume different roles, including leadership roles.

### **Teaching methods**

- 4 hours to perform the requested work
- 1 assistant providing help if required

# **Expected student activities**

Report the work

### **Assessment methods**

Report correction
