

MSE-425

**Soft matter**

Amstad Esther, Klok Harm-Anton

Cursus	Sem.	Type
Materials Science and Engineering	MA1, MA3	Opt.

Language of teaching	English
Credits	4
Session	Winter
Semester	Fall
Exam	Written
Workload	120h
Weeks	14
<b>Hours</b>	<b>4 weekly</b>
Lecture	3 weekly
Exercises	1 weekly
<b>Number of positions</b>	

**Summary**

The first part of the course is devoted to the self-assembly of molecules. In the second part we discuss basic physical chemical principles of polymers in solutions, at interfaces, and in bulk. Finally, we look at colloids and emulsions.

**Content**

- Self-assembly in liquids
  - Thermotropic liquid crystals
  - Lyotropic liquid crystals
    - Micelles
    - Vesicles
  
- Polymers
  - In solution
  - At solid-liquid interfaces
  - In bulk
  
- Colloids
  - Stabilization of nanoparticles
  - Formation and stabilization of emulsions

**Keywords**

soft materials, self-assembly, organic molecules, polymers, colloids

**Learning Prerequisites****Recommended courses**

## Physical chemistry of polymeric materials

### Learning Outcomes

By the end of the course, the student must be able to:

- Design molecules that assemble into a desired superstructure
- Predict the influence of changes in the structure of molecules on their self-assembly behavior
- Estimate the influence of the structure of soft materials on their properties
- Modify surfaces to impart a desired functionality to them
- Design colloids with a tunable interparticle interaction
- Design microscopic materials made from colloidal building blocks
- Design stable emulsions and dispersions

### Teaching methods

Exercises will be incorporated into the lectures

### Expected student activities

Solving Exercises on a weekly basis

Presentation of a challenge: This includes an oral presentation and a written report

### Assessment methods

One student project presented within the last two weeks of the semester and one written examination. The student project counts for 25% the examination for 75% of the final grade.

### Supervision

Office hours	No
Assistants	Yes
Forum	No

### Resources

#### Bibliography

Soft Condensed matter, Richard A. L. Jones, Oxford Master Series in Condensed Matter Physics
