

BIO-634

Practical - Simanis Lab

Simanis Viesturs

Cursus	Sem.	Type
Molecular Life Sciences		Obl.

Language of teaching	English
Credits	1
Session	
Exam	Multiple
Workload	30h
Hours	24
Courses	4
TP	20
Number of positions	2

Frequency

Every year

Remark

3-day Block course, every year in January. To register, contact EDMS Administration

Summary

Next time in January 2019 Yeast genetics. Introduction to yeast genetics and cell biology.

Content

We will introduce you to the basic techniques used when employing the yeast model system to answer a biological question. You will set up and interpret genetic crosses, generate synchronous populations of cells and examine various parameters thereof. You will also examine the behaviour of components of the cytoskeleton during the cell cycle. In addition, there will be a brief introductory lecture and you will be asked to read and present a paper which uses the techniques that you will learn. You will be assessed based on your performance at the bench during the course and your comprehension and presentation of the assigned paper.

Keywords

Yeast, genetics, microscopy.

Learning Prerequisites**Recommended courses**

Reading of reviews (titles to be communicated later) and knowledge of basic molecular biology.
