

BIOENG-604 **Writing for science**

Manley Suliana

Cursus	Sem.	Type
Biotechnology and Bioengineering		Opt.

Language of teaching	English
Credits	1
Session	
Exam	Project report
Workload	30h
Hours	28
Lecture	14
Exercises	7
Project	7
Number of positions	6

Frequency

Every 2 years

Remark

Meeting times will be determined according to the professor and participants availabilities.

Summary

The goal of the course is to develop effective writing skills for academic and professional contexts.

Content

This course is designed for PhD students whose English skills are advanced but whose writing needs further development. This course is grounded in current applied linguistics, and it provides the opportunity to analyze, practice and receive feedback on some of the kinds of professional and academic documents that you will write in your science studies and careers. You will find the course most useful if you are already engaged in a research project; you can then use the literature and data related to own research in the assignments.

Class members are frequently the authors of the work under review and are occasionally responsible for leading group discussions and making short presentations. Regular attendance, timely completion of assignments, and constructive participation throughout are crucial to the learning process and to the success of the course

Evaluation will be comprised of exercises, class participation, and a final project. Attendance to all sessions is mandatory.

There is very limited space: To sign up for the course please send suliana.manley@epfl.ch a brief (<1/2 page) justification for why you want to take the course. Please include your matriculation date. The course is aimed at students who are in the early stages of their PhD.

IMPORTANT: Once you have been approved by the course professor, the EDBB administrator will sign you up for the course in your student portal. Do not sign yourself up

Note

Minimum number of participants for the course to take place: 3
