

BIO-698

The making of an innovative medicine

Clerc Roger G.

Cursus	Sem.	Type
Biotechnology and Bioengineering		Opt.
Computational and Quantitative Biology		Opt.
Molecular Life Sciences		Opt.

Language of teaching	English
Credits	2
Session	
Exam	Oral presentation
Workload	60h
Hours	28
Lecture	14
Exercises	14
Number of positions	25

Frequency

Every year

Remark

Next time: Fall 2023

Summary

To expose participants to translational biomedical research (from bench to bedside and back) and drug discovery.

Content

Through a logical series of presentations both from the participants and the lecturer (flipped classroom format, oral presentations, workshops) on the making of an innovative medicine, the entire and complex process starting from the therapeutic target identification up until the clinical development and use in clinical practice of a new molecular entity (NME) will be addressed and discussed.

The course is divided in twelve sections of each 2 periods of 45 minutes :

- Section 1 Scope of the course, general organization, case study
- Section 2 Historical perspective: the modern pharmacy
- Section 3 Introduction to translational research: crossing the bridge
- Section 4 Therapeutic target identification I & II
- Section 5 Structure based drug design, medicinal chemistry, low/high throughput screening assays, MDOs
- Section 6 Therapeutic peptides and biologicals: today's - tomorrow's pharmacy
- Section 7 Personalized Healthcare (PHC) precision medicine
- Section 8 Pharmacogenetic polymorphisms, Pharmacogenomics
- Section 9 In vivo pharmacology, investigative toxicology
- Section 10 Clinical research, phase 0, phase I, II, III, IV
- Section 11 Intellectual property regulatory affairs
- Section 12 Health Hackathon - Hacking medicine

Minimum 10 participants

Maximum 25 participants

Keywords

Translational biomedical research/Drug discovery

Learning Prerequisites**Required courses**

Basic knowledge in Molecular Biology, Chemistry, Cellular Signaling, Pharmacology

Resources
