Summary

Training rotation

Content

- Doctoral students interested in conducting a training rotation must write a one page proposal delineating the educational objectives and the means by which they intend to achieve them.
- This proposal must be approved by the supervisor, by the host laboratory, as well as by the doctoral program director.
- The host lab may be any EPFL lab, providing that the training offered is related to the PhD's thesis project.
- Training rotations must take place within the first two years of doctoral studies and can last 1-4 months, with a maximum of 4 months in total. (1 ECTS per month rotation).
- The examination procedure consists in a project report written in the style of the candidacy exam report.
