

BIO-603(O)

**Practical - Oricchio Lab**

Katanayeva Natalya, Oricchio Elisa

| Cursus                  | Sem. | Type |
|-------------------------|------|------|
| Molecular Life Sciences |      | Obl. |

|                            |                |
|----------------------------|----------------|
| Language of teaching       | English        |
| Credits                    | 1              |
| Session                    |                |
| Exam                       | Project report |
| Workload                   | 30h            |
| <b>Hours</b>               | <b>26</b>      |
| Lecture                    | 8              |
| Practical work             | 18             |
| <b>Number of positions</b> | <b>3</b>       |

**Frequency**

Every year

**Remark**

3-day Block course, every year in January. To register, contact EDMS Administration

**Summary**

Training in hemato-oncology. Analysis and genetic manipulation of hematopoietic progenitor cells. Morphological recognition of main hematopoietic lineages.

**Content**

The students will learn how to:

- 1) collect and genetically modify murine hematopoietic progenitor cells
- 2) set up hematopoietic colony-forming unit assay
- 3) stain and analyze blood smears

**Note**

Please note that you are not allowed to inscribe in your own group!

Note that 3 practical courses are mandatory for all EDMS students and that they have the priority; each course has between 2 to 4 possible slots.

**Therefore, please do not register by yourself to this course, this will be done by the EDMS program administrator!**

**Keywords**

hematology, genetics

**Learning Prerequisites****Important concepts to start the course**

Students should be familiar with cell culture.

**Learning Outcomes**

By the end of the course, the student must be able to:

- Manipulate hematopoietic progenitor cells
- Grow hematopoietic progenitor cells
