MSE-735 Scanning and Analytical Transmission Electron Microscopy

Boureau Victor, Cantoni Marco, Oveisi Emad, Reyes David

Cursus	Sem.	Туре	Longuago of	English
Materials Science and Engineering		Opt.	teaching	English
			Credits	1
			Session	
			Exam	Oral presentation
			Workload	30h
			Hours	22
			Lecture	11
			Exercises	3
			Practical work	8
			Number of positions	30

Frequency

Every year

Summary

This intensive course discusses advanced TEM techniques such as: scanning TEM; analytical TEM using EELS and EDX; aberration corrected imaging; and image simulation. It is intended for researchers who have taken the introductory TEM course MSE-637 or who have a good background in conventional TEM.

Content

This intensive course is intended for researchers who are potential new users of transmission electron microscopes and have followed the introductory doctoral course on TEM or have already a good background in conventional transmission electron microscopy. It will provide them with a basic understanding of the methods, relying on an explanation of the physics at play.

Demonstrations will be given on the microscopes.

Keywords Transmission electron microscopy, EDX analysis, EELS

Learning Prerequisites

Recommended courses

Doctoral school "Transmission electron microscopy and diffraction"
