CCMX Advanced Course - Instrumented Nanoindentation

Bourban Pierre-Etienne, Bushby Andy, Randall Nicholas X.

Cursus	Sem.	Type
Materials Science and Engineering		Opt.

Language of teaching	English
Credits	1
Session	
Exam	Written
Workload	30h
Hours	20
Lecture	14
Exercises	6
Number of positions	16

Frequency

Every year

Remark

12-14 February, 2025

Summary

This course is intended for current nanoindentation users who want to gain the experience and knowledge required to extract useful data from challenging sample materials. It is also intended for users of conventional indentation methods who wish to add this approach to their portfolio of methods.

Content

https://www.epfl.ch/research/domains/ccmx/courses-and-events/nanoindent2025/?utm_medium=email&utm_source=Upcoming+Course

Keywords

Materials testing, indentation, basic theory and applications, comparison of techniques, industrial standards, coatings

Learning Prerequisites**Required courses**

Materials sciences, mechanical properties of materials
